INTRODUCTION

PROFILE OF PIMPRI CHINCHWAD

Pimpri was originally a refugee camp for migrants during India-Pakistan partition in 1947. Pimpri and Chinchwad were two villages at the outskirts of Pune. In the post-independence era, industrialization started with Hindustan Antibiotics Limited, 1956 and gained momentum with establishment of Maharashtra Industrial Development Corporation in 1962. The resultant migration of workers from across Maharashtra resulted in the formation of Pimpri-Chinchwad Municipal Authority in 1970.

Pimpri and Chinchwad city is governed by a Municipal Corporation which comes under Pune Metropolitan Region (Census of India, 2011). It is one of the largest industrial areas in India (Pokharkar and Nikam, 2009). It lies at a distance of 15 km on the north west of Pune and is bisected by Mumbai-Pune National Highway at an altitude of 530 m above mean sea level.

Pimpri -Chinchwad is home to a vast variety of industrial establishments and is well known for its automotive and manufacturing industry. The twin cities as well as the cantonment areas of Pune, Khadki and Dehu Road together form the urban core of the Pune Metropolitan Region (PMR). According to the 2011 census, Pimpri-Chinchwad has a population of 1.72 million residing in an area of 176.7 km².

Annual rainfall in the region is 850 mm and temperatures range from 10°C in winters and 35°C in summers. The base rock found throughout the region is Deccan basalt.

Indrayani River borders the north of Pimpri-Chinchwad city while Mula branches into Pavna which transects the city and borders the south. The city contains 7 major lakes including Bhosari Lake, Sumantha Sarovar, Bird Valley Lake, Ganesh Nagar talav, Shahu Maharaj talav and a few others. Thus, it has plentiful water reservoirs to suffice the needs of the city. These water bodies cover about 1.13% of the surface area of the city. They are threatened by the discharge from nallah waters, industrial waste water, anthropogenic activities, dumping of solid wastes etc.

TREE CENSUS

Tree census is defined as ‘individual counted of the species and documentation of girth, height, canopy diameter, in addition of the species.’ In view of ‘The Maharashtra (Urban Areas) Preservation of Trees Act (1975) (Amended in 2010, 2012 and 2015), for better preservation, protection and plantation of trees on Urban areas, it is binding to the all Municipal Corporation and councils to carry out a census of trees in all areas within the jurisdiction once before 1996 and thereafter once in every five years.

As per the Rules, PCMC intends to undertake Census of trees Pimpri Chinchwad Municipal Corporation intends to undertake census of trees. The Authority intends to manage and implement the GIS based tree census management system for managing the tree permissions and monitoring of tree cover in the city. The PCMC has an area of 181 Sq. Km excluding the defense area and is divided into 64 electoral wards or tree zones.

The tree census can serve as a potential platform for an environmental education program about the clean air, recharging of ground water, maintenance of biodiversity, reduction of noise pollution and so on. Action on legal - illegal tree cuttings can also be processed with the help of tree census data.

The present document summarizes ‘Tree Census for Pimpri- Chinchwad Municipal Corporation’. The project was commissioned to Terracon Ecotech Pvt. Ltd., Mumbai.

Tree: A plant, by habit, having woody stem or trunk with minimum girth of 10 cm at chest level and has a height of 3 m above the ground level (Maharashtra Tree Act 1975 & Various Flora / Field Books on plants).

SCOPE OF THE PROJECT

Geo-referencing the electoral ward boundaries/ tree zone and Zone boundaries of PCMC using DGPS and ETS

1. Create a digital library (database) of indigenous trees. The digital library shall contain tree details like common name, botanical name, flowering season, flower photo, fruit photo, native/exotic, tree photo, carbon sequestration rate and tree use.
2. Development of mobile and web application, and receive Application Implementation Certificate from DIT department of PCMC
3. Procure and supply the GIS Platform; Operation, Maintenance and Management for 5 years
4. Prepare urban forestry plan
5. Conduct tree census in the PCMC Jurisdiction using GPS enabled mobile device
6. Application will generate tree cover analysis, carbon sequestration rate

OBJECTIVES

The tree census is carried out for following objectives, which can be categorized in general and specific.

The general objective was to map all trees present, on all lands, within the jurisdiction of Thane Municipal Corporation, to understand the diversity, density and distribution of trees across the city.

THE SPECIFIC OBJECTIVES WERE

- i. To prepare phenological database of all tree species present in the study area.
- ii. To prepare database to assess the importance of tree species found across the city.

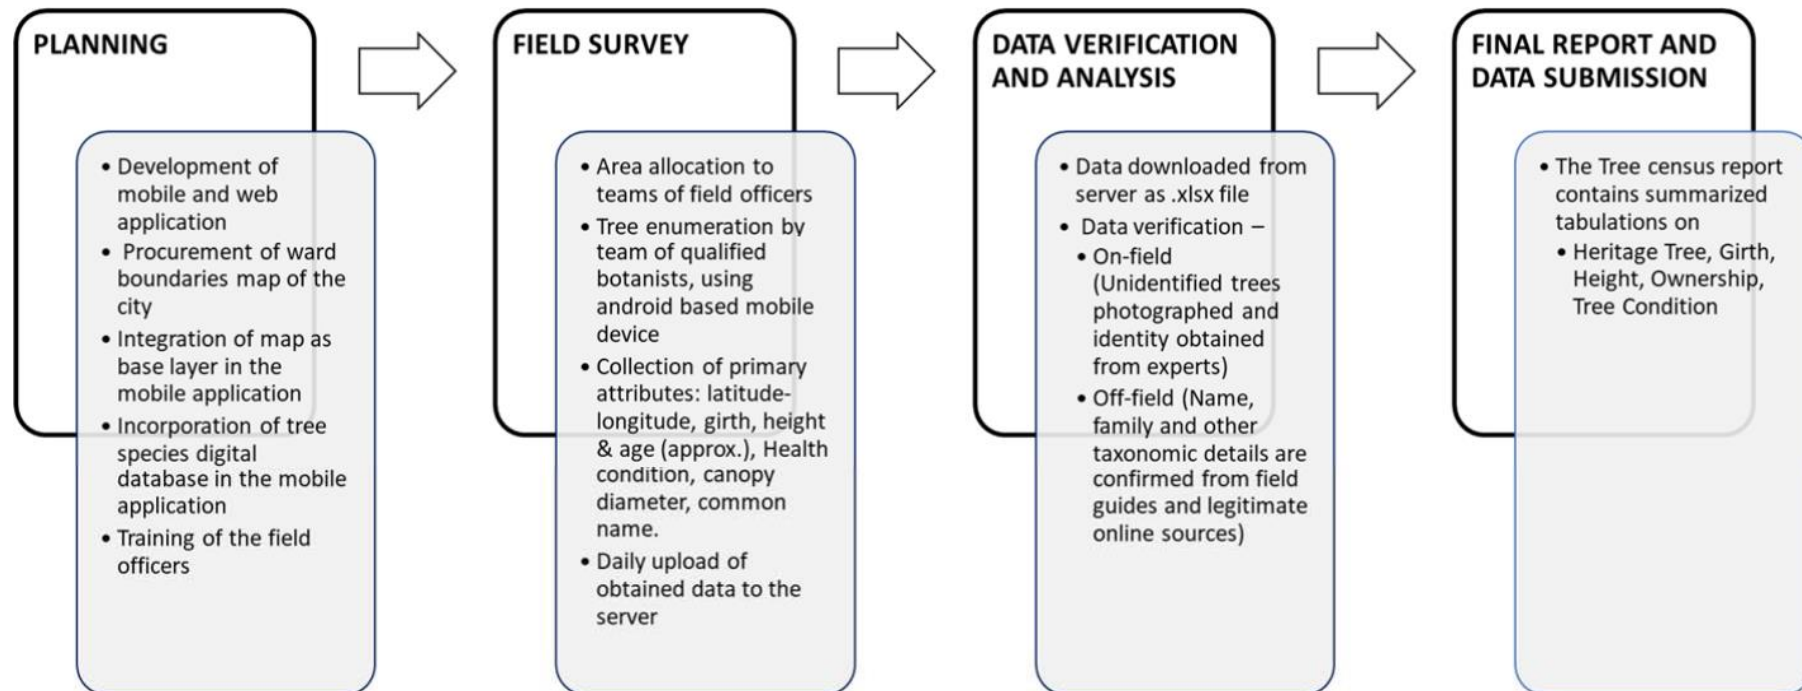

MATERIALS AND METHODS

The data collection was carried out using census method, by which each and every individual tree was counted. The pioneer step was to develop a mobile application that can collect all required data pertaining to phenology, morphology and location of the trees.

In order to collect the primary data from the field, PCMC, a web-based mobile survey application was developed.

Simultaneously, the data collected using mobile application was synchronized with the web-based application. This helped in the transfer of collected data on the field directly from the mobile application to the main server.

DIAGRAMMATIC REPRESENTATION OF THE METHODOLOGY

TREE CENSUS PROJECT EXPECTATIONS AND PLAN OF ACTION

SN	Activity	Schedule as per RFP		Actual
		Start month	End month	Completion
1	Server Hardware, Mobile, Disto-meter, Software Procurement and	Jan-18	Apr-18	Apr-18
	supply			
2	Software training	Jul-18	Aug-19	Sep-19
3	SRS Approval	Feb-18	Apr-18	Jul-18
4	Tree census Application Development and Go-live approval	Jan-18	Jul-18	Jul-19
5	Submission of Pilot survey- Morewadi	Jul-18	Aug-18	Dec-18
6	Submission of Draft Urban Forestry Master Plan	Jan-18	Jul-18	Aug-18
7	Submission of Final Urban Forestry Master Plan	Jan-18	Aug-18	Dec-21
8	Submission of Survey Data - Zone A - F	Jul-18	Jan-20	Sep-21

SN	Activity	Schedule as per RFP		Actual
		Start month	End month	Completion
9	Validation & Approval of census data	Dec-19	Jan-20	Feb-20
10	Submission of Draft Census Report	Dec-19	Jan-20	Nov-21
11	Submission of Final Census Report	Jan-20	Jan-20	Dec-21

PCMC APPLICATION

DEVELOPMENT OF MOBILE APPLICATION:

THE MOBILE APPLICATION FOR CENSUS OF TREES HAVE THE FOLLOWING FUNCTIONALITY.

- i. Able to capture data in both online and offline connectivity mode.
- ii. Able to authenticate the surveyor/user whenever he logs in to the application.
- iii. Automate the capture and transfer of all the field reading from all the field devices to the GIS server.
- iv. Automate the capture and transfer on GIS server the latitude and longitude from the digital total station.
- v. Generate unique ID for each surveyed tree. The generated code number shall have reference of zone & ward no.

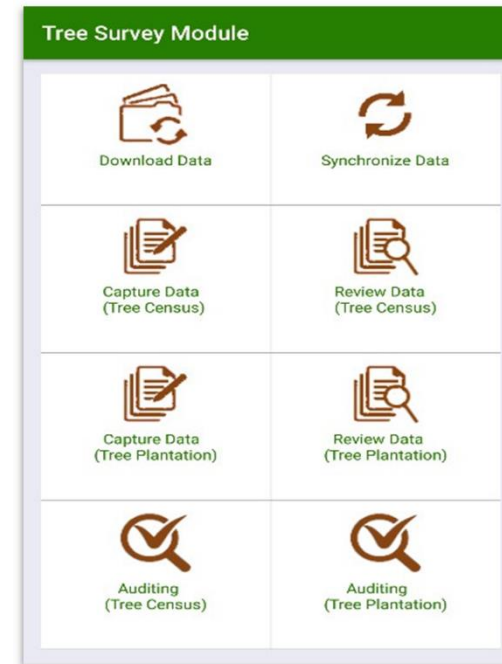

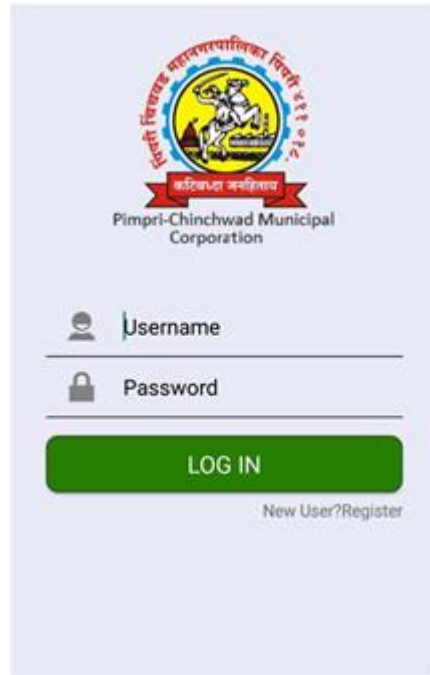

FUNCTIONAL OVERVIEW

Following are the functionalities wherein the customization provided

MOBILE APPLICATION

1. Login
2. Data Synchronisation
3. Tree Survey Module
4. Tree Survey – Plantation
5. Tree Species Digital library
6. Tree Cutting permission system
7. Tree cutting permission system for hoarding / flex structures
8. Report illegal cutting and inspection (Grievance)
9. Surveyor location tracking
10. Tree compliance

MOBILE APPLICATION

ATTRIBUTES COLLECTED DURING SURVEY

TREE ID		TREE CLASS	NATURAL SURVIVAL CAPACITY
ZONE NUMBER	ENGLISH COMMON NAME	OWNERSHIP	
WARD NUMBER	MARATHI COMMON NAME	SCOPE OF PLANTATION	
NAME OF FIELD OFFICER	HINDI COMMON NAME	TREE FAMILY	

SURVEY NUMBER	SCIENTIFIC NAME	REMARKS
IN PREMISES	GIRTH	COMMENTS
BUILDING NAME	HEIGHT	SURVEY DATE
STREET NAME	CANOPY DIAMETER	TREE PHOTO ID
LOCALITY	CONDITION OF TREE	LATITUDE
LANDMARK	USE OF TREE	LONGITUDE
PLOT AREA	CATEGORY OF TREE	TREE EXIST

MOBILE APPLICATION

TREE MAINTENANCE APPLICATION PROCESS

Tree cutting permission module is accessible to all authorized user. This module will initiate request for tree cutting permission.

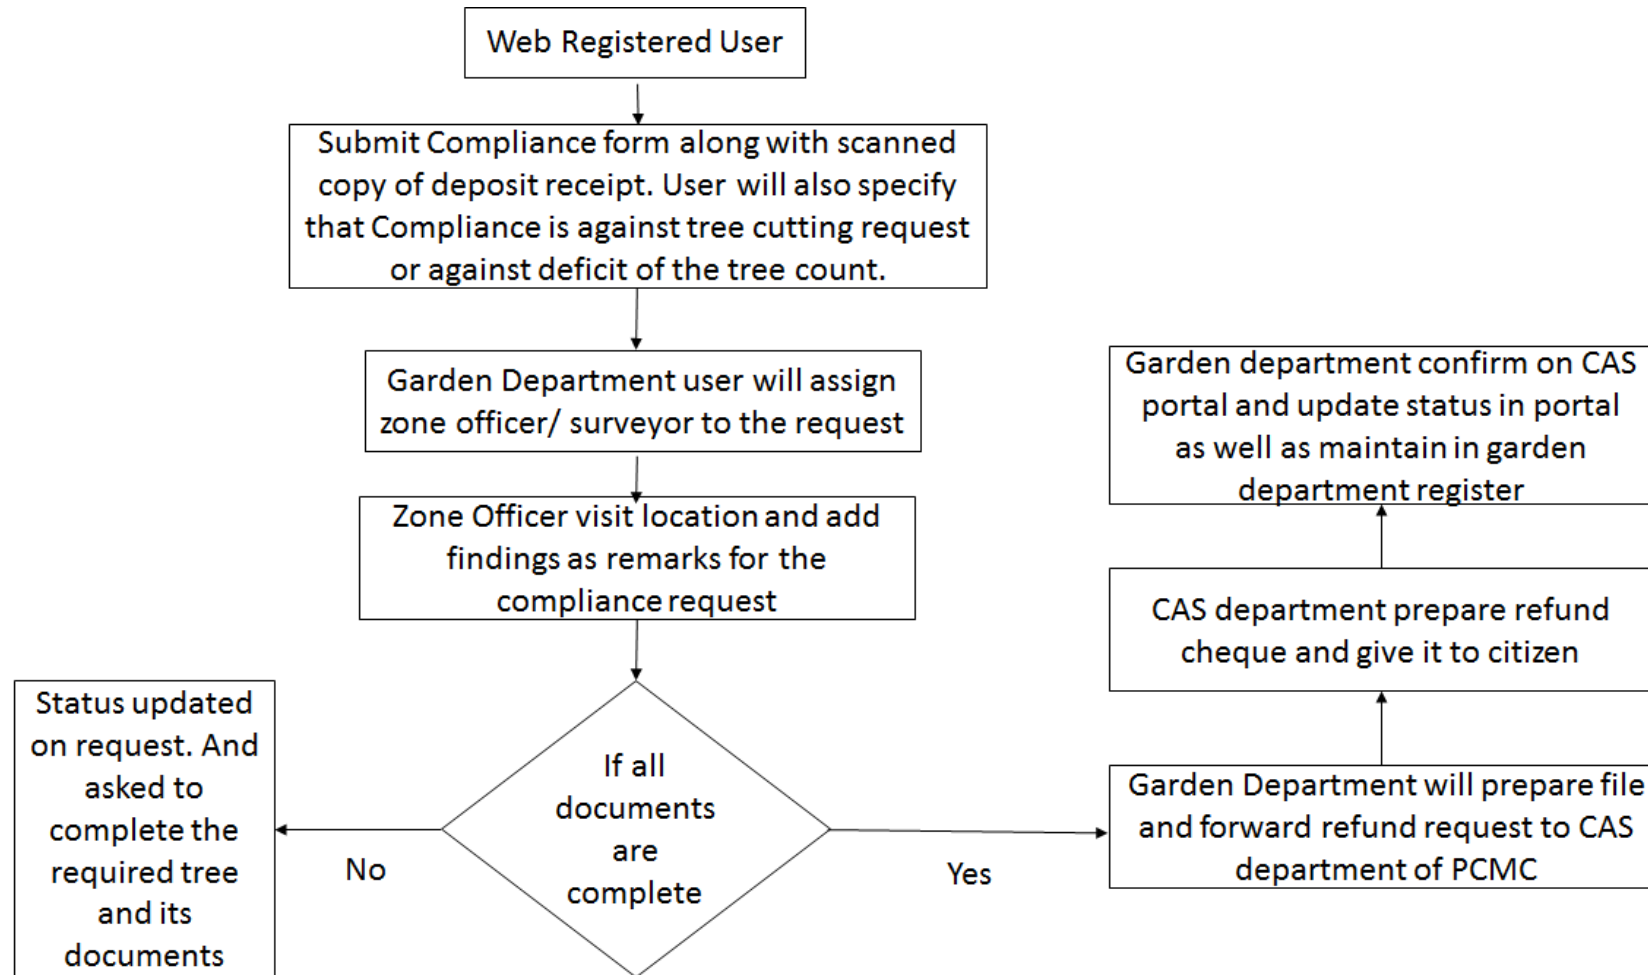

Once any user requests cutting of a tree partially or fully, a tree cutting request with required parameters will be generated, after which the administrator from the garden department will be able to visualize the tree on geoportal web. Garden department officer will then physically survey the requested tree and update his comments, based on which the tree cutting permission will be accepted or denied. After permission is granted and tree has been cut then updated photographs will be captured and uploaded.

FLOW FOR TREE MAINTENANCE PERMISSION AND REQUEST PROCESS FLOW AT VARIOUS PROCESS LEVEL.

FLOW FOR TREE MAINTENANCE REFUND PROCESS

RESULTS AND CONCLUSIONS

Total number of trees found in area was 32,16,799. The trees have been counted in the areas which were permitted. A zone wise non permitted list of 220 tenements, oblique properties, companies has been provided to the department.

SN	Zone	Area Sq.Km	Tree Count
1	A	22.4	3,06,094
2	B	29.5	4,62,137
3	C	11	3,51,173
4	D	18.6	5,12,368
5	E	58.5	8,43,824
6	F	36.7	7,41,203
Total		181	32,16,799

The results were categorised Zone wise in various parameters viz., individual tree count, heritage tree count, ward-wise tree count, ownership wise, height-wise, and condition wise.

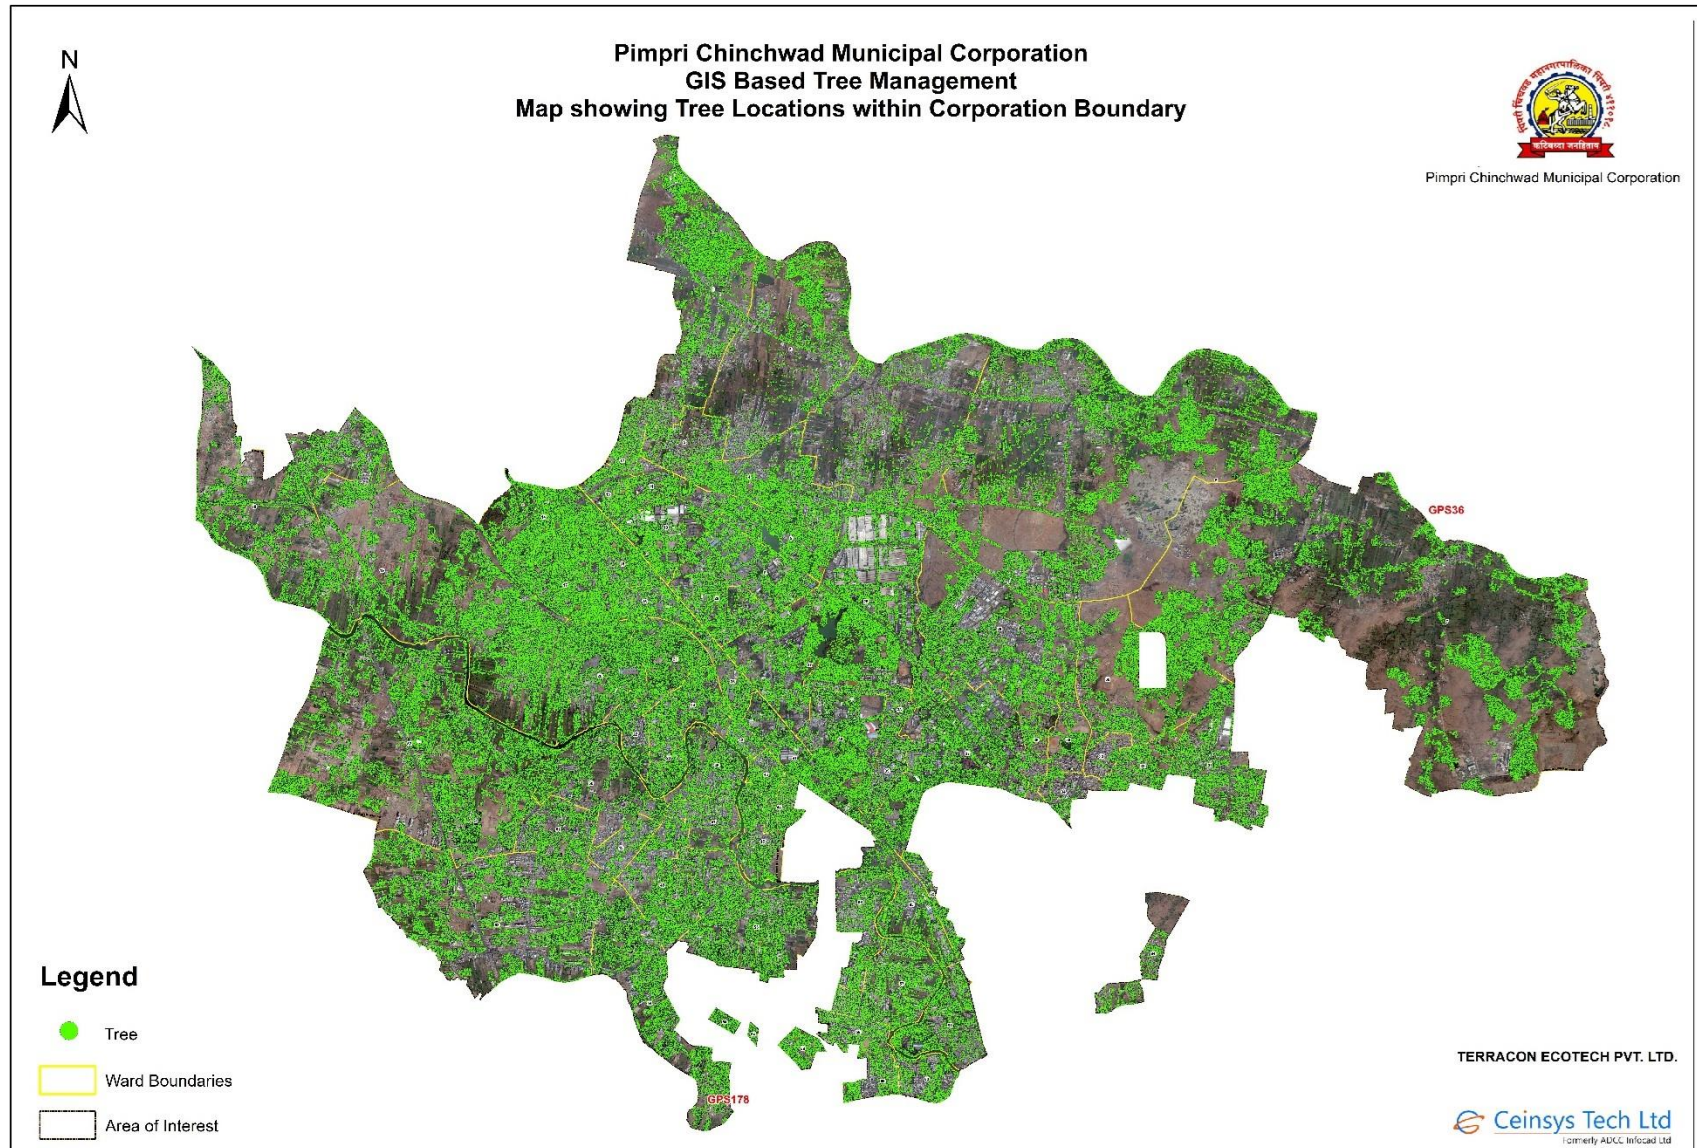

Figure 3: Map Showing Tree Locations Within Corporation Boundary

HERITAGE TREES:

According to the new amendment proposed by Maharashtra government to the Maharashtra (Urban Areas) Protection and Preservation of Trees Act of 1975, provisions will be added for the protection of 'heritage trees'. Under the proposed amendment, a tree with an estimated age of 50 years or more shall be defined as a heritage tree. World Heritage Convention & UNESCO has laid about 10 operational guidelines for the implementation to conserve the trees and the natural landscape on a universal scale. The criteria also indicate the ecological role that a species can play within a community.

CRITERIA FOR HERITAGE TREES:

1. Important native tree species.
2. Trees having cultural value &/or worshiped (worshiped during various festivals or otherwise).
3. Tree species falling in the RET (Rare, endangered and Threatened) status.
4. Tree species having an ecological importance such as confined to the special habitat and difficult to grow, native to eco-region or the country.
5. A large tree whose value is considerably irreplaceable.
6. A tree associated with a historic person or event, or has been a landmark for years.
7. Important forest tree species present within the existing landscape.

On the basis of these categories, heritage trees were determined from the lists of trees of each zone of PCMC. They are as follows:

Heritage trees of Zone A								
SN	Scientific Name	Heritage trees	SN	Scientific Name	Heritage trees	SN	Scientific Name	Heritage trees
1	<i>Acacia catechu</i>	6	32	<i>Dalbergia lanceolaria</i> var.	1	63	<i>Millingtonia hortensis</i>	69

TERRACON PROJECT TEAM

Project Name: Census of Trees and Development of Application for Tree Management using GIS Platform	
Prepared for: Pimpri Chinchwad Municipal Corporation	Prepared by: Terracon Ecotech Pvt. Ltd. JV PARTNER: Ceinsys Pvt Ltd
Terracon Project Team Mr Ashok Jain, Dr. Ninad Raut, Mrs Prachi Mayekar, Ms Pratiksha Chalke, Mr Nitesh Nikam, Mr Afsar Salmani, Mr Akshay Nachane	
Authorized signatures  Dr. Ninad Raut (Head – Ecology and Biodiversity)	
Final report December 2021
