12. WINTECH (MYGREENBIN)

My Green Bin
LIVE CLEAN GO GREEN
Creating wealth from waste

WINTECH SQUARE PVT LTD.

CLEAN INDIA
Privileged to be part of Swachh Bharat Mission

BENEFITS OF MY GREEN BIN

- Replaces Petro Chemical Fertilizers
- Reduces Global Warming
- Controls Soil Erosion
- Natural Organic Manure
- Reduces waste at source by 80%
- Balances pH of Soil
- Natural Recycling
- Healthier Society
- Organic Food
- Reduced Air and Water Pollution

About us

The idea of effectively managing waste has been practiced from time immemorial, though, has lost participation from people owing to it being a painstaking process. Your organic house waste shall no longer turn into unhygienic, foul smelling, hazardous matter polluting the MOTHER EARTH. Wintech Square Private Limited has come up with a unique solution by formulating an organic composting bin that enables users to convert the organic waste into extremely effective bio-fertilizers and planting media.

Wintech Square Private Ltd is a waste management social enterprise that is moving India's solid waste sector to models that are simultaneously, environmentally and financially sustainable. We offer professional waste management and processing services to households, Community composting for Residential apartments and Institutional clients like Schools, Colleges, Offices, Hotels, Restaurants, Canteens, Factories, etc.

OUR WASTE OUR RESPONSIBILITY

THINGS NOT TO GO INTO MY GREEN BIN

No Liquids No Plastic No Napkins No Soil, Rocks No Recyclables

Avoid Coconut Shells / Spoiled Food Packets/ Spoilt Milk or Any Liquid Food

COMPOSTING PROCEDURE

- Spread 1 inch layer of My Green Microbes at the bottom of the bin.
- Add 3 to 4 inches of waste to the bin.
- Spread My Green Microbes evenly on the top.
- Now again you can add 3 to 4 inches of waste.
- Spread My Green Microbes again.
- Just repeat the process till the bin fills up.
- Leave the first bin for composting by covering it with layer of microbes.
- Start the above process in second bin.
- Both bins can be used alternatively and get rich manure.

MACHINE INFORMATION

COMPOSTING PROCESS

1. Crushing + Grinding
2. Maceration of waste
3. Mixing
4. Moisture Reducing
5. Emptying
6. Fogging
7. Composting and Curing

WASTE CRUSHER

Used specifically for veg-non veg vegetarian food, garden & temple flowers wastes (Nirmalya). Its robust design ensure crushing of bones and other hard material. This equipment is also suggested when proportion of hard and big fruit peels like banana, pomegranate, watermelon, lemon, banquet flower waste etc. form a major part of food waste.

COMPOSTING MACHINE

Powerful gear drive : Gear box transmission gives sturdier design. Reduces power consumption by about 50% compared to other such system. Control panel ensure easy and hassle free operation. Waterproof bearings ensure longer life of the moving parts. on overloaded machine gets trip.

FOGGING AND CURING SYSTEM

A rack system to put perforating crates of pre-compost. Pre-compost is kept for 5-7 days with intermittent spraying of water mist required to speed up the composting process as well as pH correction of the pre-compost

FEATURES

- Different models for different requirements for Society, Hotels, Vegetable Market etc.
- Manual as well as automatic models available with PLC and HMI.
- Effective odour control.
- Powerful shredder with integrated geared motor.
- 50% less power compared to other such system.
- Safety lock on the lid ensures stoppage of machine when lid is opened during machine run.
- Machine can be worked on 1 phase / 3 phase according to requirement.

EFFECTIVE WASTE MANAGEMENT WILL ACHIEVE BENEFITS AS :

- 5% Discount benefit on property tax on apartment in Maharashtra.
- Compliance with government regulations and codes.
- Minimum odour and improved aesthetics and sanitation.
- Least manpower requirement for waste handling and disposal.
- Revenue from the sale of recyclables.
- Prevention from insect and rodent infestations.
- Reduction of fire hazards.

Waste to Compost in Just 24 hrs.

Organic Waste Composting Machine

16.SWAAHA RESOURCE MANAGEMENT

ABOUT US

Swaaha Resource Management Pvt. Ltd. (Swaaha) is a social enterprise set up by alumni of IIT Indore with an aim to provide professional waste management services and solutions to institutions, organisations, corporate houses and residential townships.

Swaaha perceives "Waste as a Resource" and aims to spread the social, economic and environmental benefits of this approach. Swaaha believes that a "Zero Waste" policy is a quintessential alternative to the existing waste disposal methods. "Zero Waste Campuses" with the sustainable waste management practices in place is the next step towards a "Swachh Bharat".

The name Swaaha is taken from initials of words Swachh (Clean) and Hara (Green), which are two fundamental tenets of proper waste management. Swaaha also means a pious sacrifice, which fosters our third and final aim of eradicating poverty by economically empowering the people involved in this sector.

SUPPORTED BY

#startupindia

FEATURES

- AUTOMATIC**
Fully Automatic Processing
- Plug and Play Operations**
- IoT based Data Management**
- High Processing Capacity in Compact Size:** 2000 kg/day
- 2 TON**
- 1** Cater multiple clients
- 2** spread across the entire city
- 3** No capital investment required
No space lost in installing bulky machines
- Subscription based service
Pay only for the quantity of waste produced

PERFECT FOR

- Hotels & Restaurants
- Residential Townships
- Educational & Government Institutions
- Vegetable & Fruit Markets
- Transportation Hubs

17. IDEAL Services

OPERATIONAL FEATURES

- Fully automatic machine.
- Composts all types of wet garbage including nonveg.
- Low noise.
- Unskilled labour can operate machine with basic training.
- Compact machine size.
- No pathogens, safe for human handling.
- No foul smell, no rats/ insects/flies.
- Good aesthetic look.
- Auto power saving mode to reduce power consumption.
- Equipped with VFD system.
- Auto composting process.
- PLC system to reduce human error.
- Equipped with stainless steel tank and machine parts which directly connected to composting material
- Overload function-machine comes to a halt in case of overload
- In case of power failure auto start function when supply on
- Maximum safety features, for human being and better machine life
- HMI display with Touch Screen for better understanding machine process
- Easy operating system
- Emergency switch and safety limit switch
- Centrifugal fan for remove bad odor and provide aerobic situation for composting

MODEL SPECIFICATIONS

MACHINE MODEL	CAPACITY	SIZES in MM
MODEL ACMS 50	50 KG/DAY	1200x750x1195 LDH
MODEL ACMS 100	100 KG/DAY	1600x1000x1540 LDH
MODEL ACMS 200	200 KG/DAY	1920x1200x1800 LDH

19. Green Compost Shredding setup

Rama Sham Agro Tech Private Ltd to solve the rising problem of handling and disposal of Wet Bio-Waste generated in our surroundings have manufactured the following equipment's

1. Bio-Waste Shredder

(Shreds Kitchen Waste, vegetable/Fruit Scraps Dried Leaves and small twigs)

Size Available 30 kg, 50 Kg, 100 kg and 300 Kg

2. Garden Chopper

(for chopping Green Coconut and branches having thickness till 25mm)

Sizes Available: 2 HP and 3 HP motor

3. Composters

(For Composting Shredded Material through Dynamic Composting)

4. Stabilizer

For Stabilizing the Shredded and composted material

Rama Sham Agro Tech Pvt Ltd
Sr.No 26, Barne Industrial Estate,
Opp.Pudumjee Paper Mills, Ther-
gaon, Chinchwad

Suresh Laud 9881144015

Email

ramashyamagrotech@gmail.com

The Machines designed and manufactured by us have the following advantages :

1. They occupy less Space
2. They consume less energy
3. They do not emanate bad stench and hence pest problem is reduced
4. The volume due to shredding is reduced to 40% and hence it can be stored and transported easily.

The Shredded material can be used for

1. Composting
2. Generating Biogas
3. Making briquettes
4. Animal feed

We also provide advice on how the shredded material can be better utilized to the maximum benefit of the consumer

Coconut Fibre AND Cocopeat

Bio-Waste Composter with aeration and movement facility

1. Bio-waste + Dried Leaves are Shredded
2. Shredded material + Cocopeat added to Composter
3. Composter gives out Composted material and Leachate
4. Composted Material stabilized to Manure

Bharal Mahale

Clean Earth

Recycle And Processing Of Dry and Wet Waste.

Clean  Earth

Among the daily waste generated by us, plastic is extremely harmful to the environment and earth, if it not properly disposed.
"Through our company we assure you that we dispose the waste you give us without causing any harm to the environment".

The amount of garbage waste coming from societies, commercial and residential areas, showrooms, companies which reside under Pune Municipal Corporation and Pimpri-Chinchwad Municipal Corporation is increasing on a large scale day by day. The year 2019-2020 recorded the average of garbage collections around 2100 Tons per day and solely Pimpri-Chinchwad Municipal Corporation recorded the garbage collection on an average of 800 Tons. Both the municipal corporations ever after utilizing Crores of rupees is still not able to properly dispose of the garbage that has been collected. As a result, the villages and areas surrounding the dumping grounds are facing of problems and health issues and in turn polluting the mother Earth. To reduce and come over these problems, Clean O Earth, a Pune based company has come up with a new idea in the year 2018. Since both the Municipal Corporations are not disposing the garbage in a well manner, Our Company has taken an initiative to collect the garbage form the residential and commercial areas and dispose them with the proper process.

So our company is willing to work in your areas and help to reduce and improvise the process of garbage disposal, we kindly request you to consider and sanction our plan for the same.

About Us

We Clean O Earth incorporate in 2018, works in Solid waste management.
 Our aim to make land/Earth waste/garbage free or zero waste land, and we are moving in that direction. We make compost from wet and garden waste, recycle almost all dry waste.

Working process of the company

1. We collect segregated dry and wet garbage from – societies, companies, and corporation and Panchayat areas and take it to our plant.
2. Segregate dry waste recycle and dispose .
3. From wet waste we make compost. Which is very much useful for agriculture purpose, and eco-friendly.

Clean  Earth

“We strictly follow ZERO dumping policy”.

Clean and Green Mother Earth

- » Pollution free process does not harm to the environment.
- » Technology does not contribute to greenhouse gases.
- » Our aim is Zero Waste Dumping.

We Cater to

Residential Township, Hospital canteens, Factories/Industries, commercial complexes, any bulk waste generator.

Company's Financial Profit

The payment for fuel, man power, transportation etc. will be taken as a token of respect per month from Societies, hotels, Gram panchayats, etc.

Our Esteemed Customers

- » Magarpatta City, Hadapsar
- » Abhiman Township, Sirgaon
- » 7 Plumeria Drive, Punawale
